SKILLS

- ABAP S/4 HANA
- SAPUI5 / Fiori
- JavaScript
- SAP Business Workflow
- OData, REST, SOAP services
- CDS
- RAP - RESTful Application Programming Model
- SAP Screen Personas
- Git

SUMMARY

I am a Full Stack SAP Developer. I work daily with ABAP SAPUI5 Fiori JavaScript and SAP Business Workflow. I am proficient in building of OData services REST APIs CDS views and SOAP services. I have experience with RAP (ABAP RESTful Application Programming Model).

Mostly I work in SAP S/4HANA environment but also have experience with older SAP ERP releases. Primarily in modules FI-CO, HR/HCM, SD, MM, and BW.

For development, I use Eclipse ADT and SAP Business Application Studio and sometimes VS Code. I am proficient in utilizing Git for source code management and team collaboration.

Apart from project development, I support business as usual—analyzing errors, fixing bugs, and designing new business solutions.

I have successfully delivered multiple projects for European and Asian customers. In my projects section, I've highlighted the most significant ones—those where development took longer than two months.

EXPERIENCE

EmbedIT s.r.o., Czech Republic

Senior SAP Software Engineer

February 2019 - Present

As an SAP software engineer, I design and develop business solutions for end customers. My largest projects have included development in ABAP, SAPUI5, and SAP Business Workflow. Apart from working on projects, I support business-as-usual operations by analyzing issues, extending core solutions, and implementing enhancements.

Heidelberg Materials, Germany

Senior SAP Software Engineer

September 2021 - Present

I deliver software solutions for a German customer, primarily in the areas of SAP Business Workflow, custom ABAP business logic, and Fiori application development. I participated in the transformation from the old ERP system to S4 HANA. Apart from developing new solutions, I support my projects, extend solutions, and analyze issues.

DHL Information Services s.r.o., Czech Republic

SAP Software Engineer L3

February 2018 - January 2019

As a full-time employee, I supported business operations by fixing issues, enhancing existing solutions, and developing new applications using SAPUI5 SDK and ABAP. I had the opportunity to travel to Kuala Lumpur, Malaysia, to train developers in the areas of Fiori and SAPUI5.

CONSIT s.r.o., Czech Republic

SAP Fiori FrontEnd Developer

June 2016 - January 2018

As a full-time employee, I designed and developed internal HR applications for company employees. I worked with SAPUI5 SDK, JavaScript, and ABAP. I also developed the company website. In this company, I had the opportunity to work with SAP for the first time.

Freelance

Web developer

January 2016 - May 2016

I started my career as a webmaster and web developer. I became familiar with HTML JavaScript and Adobe Photoshop. During this time, I worked on small tasks for multiple websites and developed my very first website, <https://www.strednyliptov.sk>

EDUCATION

University of Žilina

Services in IT

2010 - 2015

I successfully graduated with a degree and wrote a diploma thesis on securing web forms in PHP.
